The 34" wide Ventrac KX340 Snow Blower is built for commercial snow clearing operations of sidewalks, driveways, and other areas. A two stage snow blower, the KX340 features a 12-3/16" diameter solid auger for best snow transfer, a large 18" diameter fan, and the ability to move SSV pounds of snow per minute at distances up to 30 feet. Standard features include adjustable cast iron skid shoe discs at the rear, high carbon hardened steel shoes at the side, and a reversible high carbon hardened steel cutting edge.

The hydraulically activated discharge chute can rotate 228 degrees, all from the convenience of Ventrac's exclusive S.D.L.A. control system. Chute deflection is manually adjustable. An electric chute deflection controller is optional.
