*Some cracked seeds were observed at setting 1.

Brillion assumes no liability pertaining to seeding rates achieved with this seeder. Rates listed are general in nature and should be used as starting points only. Seed varieties and blends listed represent those calibrated through in-house test meters. Variations in actual rates may be realized due to differences in seed lots. For accurate rates with seeds being used, follow the calibration instructions listed on the seed chart inside the box cover or refer to the Operator's Manual.

Brillion has applied its years of experience as a leader in the agricultural and landscape seeder industry to the FPS Series Food Plot Seeder. The Food Plot Seeder is designed to operate under a wide variety of conditions and plant numerous grasses, legumes, small grains, and other blends and mixes. The key to positive seeding results is optimum seed to soil contact. The FPS Series has the features to provide the necessary seedbed preparation, the seed metering and placement, as well as seedbed finishing, all of which provide a state of the art food plot.
