SIMPLE STALL-POINT MILKER INTERFACE

When limited time is available to access data at each stall point, ViewPoint offers a milker interface for the entire milking facility, through one or more optional touch screens placed in the parlor. The ViewPoint Touch Screen can be programmed to provide information needed for the entire parlor, plus vital individual cow data can also be accessed at the touch screen.

For dairy operators who want their milking crew to concentrate on quality milking procedures ViewPoint is ideal – a simplified milker interface with a single remote start button and single LED.

- **Heavy duty** – Built for the harsh dairy environment (IP69) ICAR meter – ViewPoint is paired with the SmartControl™ Meter, our high flow, ICAR approved meter to give you the best results in accuracy, throughput and vacuum stability
- **Simplified Interface** – A single remote start button and single LED allows milking crew to concentrate on the milking procedures
- **Air or Vacuum Operation** – ViewPoint installations operate with either air or vacuum cylinder detaching units. Integrated ViewPoint cabinet panels are available in 2- or 3-stall options, pre-wired for communication, power and individual pulsation with quick connect wire connections.
- **Retrofit Installations** – Individual stand-alone ViewPoint cabinets are available pre-wired for communication, power and individual pulsation, with quick connect wire connections. QuickStart is available for individual stand-alone ViewPoint cabinets with plastic vacuum cylinders only.
