

Fresh, clean water should be easily accessible to the pigs at all times. A nipple drinker dispenses a controlled amount of water which prevents water waste and excess water from pooling on the floor where piglets could lay in it and become sick. It also minimizes the chance of piglet drowning. Drinkers reduce wasted water and keeps pigs environment drier.

FEATURES

- Available in stainless steel or galvanized.
- Piglet drinkers available as nipple drinkers or water cups.

OPTIONS

Available as nipple drinkers or water cups
