

Since 1948

IntelliChain®
Alley Scraper

The IntelliChain® Alley Scraper System has the brawn and the brains needed to keep your herd clean 24/7/365!

Designed with your operation in mind!

- Advanced **SmartSense®** learning system constantly adjusts to weather, bedding, and manure changes while recalculating the amount of energy required to clean.
- Energy-efficient planetary gearbox powered by single $\frac{3}{4}$ -hp motor!
- Narrow, space-saving drive unit design provides ultimate layout flexibility.
- Slider sleds available for layouts with alleys of unequal lengths.
- Total circuit up to 1,000 ft. (305 m).
- On-floor or recessed chain installation available – easily installs in new or existing barns!
- Low maintenance user-friendly system!

“Overall, it's quite an asset to the operation. It's a more sensitive system, we've got a clean barn, and I'm happy to have it in our operation.”

-WI Dairy Farmer

**Let Patz handle your manure
so you don't have to!**

Work Smarter, Not Harder!

MANURESOLUTIONS

Manure happens ... make the most of it with

SmartSense® MasterMind Control Panel

Provides the quality and safety features you want for your employees and family.

- Fiberglass frame with easy-to-use, quick-connect electric cables with pre-wired junction box.
- Glove-friendly, easy-to-use, 5.7" (145 mm) color HMI touch screen display.
- Large, easy-to-recognize universal language icon navigation.
- 3 operational modes: MANual, CONTinuous, and AUTOMatic (schedule up to 12 cycles per day).
- Adjustable speed control.
- "Auxiliary Relay Function" allows the operator to automatically start another machine, lights, or horns by supplying a start signal.
- Patz innovative "Learning System."
- Superior sensitivity - programmable BUMP feature.
- Advanced "Patz Remote Notification" emails and/or text messages operator(s) with scraper status and service updates. Transmits updates following corrective service.
- Faults are stored in memory up to 4 weeks—even if power is cycled. Allowing service technicians to quickly troubleshoot.
- Integrated LOCK-OUT/TAG-OUT power disconnect lever.
- HARD PULL one-button feature works great for freshly bedded alleys and times of heavy or excessive manure.
- QUICK CLEAN feature cleans alley in between scheduled cleanings.
- PARK feature positions scrapers out of way when needed (designate alternate scraper location other than HOME).
- Black plastic manual box included to protect Operator's and Parts Manuals from the environment.

IntelliChain® Drive Unit (Continued)

- Driven pulley** takes power from motor to planetary to pocket sprocket which, in turn, drives the chain.
- Planetary** gearbox is more energy-efficient, uses less horsepower than conventional gearboxes, and provides quiet operation.
- Pocket sprocket** cradles the chain, effectively driving it in forward or reverse. Connected to the reducer with a tapered bushing, the pocket sprocket is easy to replace (sprockets available in four different colored stages for easy identification).
- Drive unit corner wheels** can be placed in straight, corner, parallel, or offset mounting formations for layout flexibility and space savings (see Drive Unit Configurations below). Steel housing encloses drive unit corner wheels for safety and protection. Corner wheels feature hardened axle and nylon bushings for longer life.

7 DRIVE UNIT CONFIGURATIONS

"I" (Straight) Position
Most basic setup.

"L" (Corner) Position
This setup positions the drive unit in the alley.

"U" (Parallel) Position
This setup provides space savings and locates the drive unit in a corner out of basic travel routes.

"Z" (Offset) Position
This setup provides space savings by narrowing up the space required for the drive. Can be used instead of the "straight" position.

- Patz chain** is made of high-quality 1/2" (13 mm) hardened steel to withstand the stress and friction of contact between links and concrete alleys. To ensure you always receive genuine Patz chain, every sixth link is imprinted with 'PTZ.' Patz chain can be ordered in a variety of lengths, including custom lengths in one-foot increments for splice-free installation.
- Guard doors** provide safety for operators and protection for drive unit components. Opening a guard door will activate a **safety interlock** that automatically shuts the unit down.

IntelliChain® Drive Unit

- Three-phase, ¾-horsepower electric motor** efficiently powers the drive unit. (IntelliChain® Alley Scraper will operate on single- or three-phase input power.)
- Motor pulley** is a common single belt and pulley design for power transfer from motor to planetary gearbox. Large motor pulley designed for greater belt life.
- Sensor disc and proximity sensors** work in conjunction to provide the SmartSense® Control Panel necessary information to keep track of the scraper's position and direction.

"We had one of the coldest winters ever, and the scrapers worked every day. Better yet, the herd SCC counts have decreased!"

-WI Dairy Farmer

Customize your IntelliChain® Alley Scraper to fit your operation!

Corner Wheel

Cover removed for viewing.

Low-Profile Corner Wheel

12" (305 mm) nominal diameter welded plate steel corner wheels feature a low-profile design. 2" (51 mm) diameter hardened axle and nylon sleeve bearings provide low maintenance and long life.

Folding V Scraper

- Low-profile scraper wings and folding design allow easy passage for animals, tractors, and skid-steer loaders when bedding freestalls.
- Replaceable wings available for easy servicing.
- Cleans alleys with widths from 64 to 174 inches (1.6-4.4 m).

Folding Angled Tip-Up Scraper

- Wings pivot to follow wall tightly for better cleaning.
- During the reverse movement, the blades tip up and the wings pivot inward.
- Heavy enough to clean better; extra steel in wear points.
- Cleans alleys with widths from 84 to 192 inches (2.1-4.9 m).

- Replacement blades and wings available for easy servicing.
- Scraper removes easily – center in slot and lift off.
- Scraper can be replaced without removing sled.

Versa Folding V Scraper

- Low-profile scraper wings and folding design allow easy passage for animals, tractors, and skid-steer loaders when bedding freestalls.
- Cleans alleys with widths from 64 to 174 inches (1.6-4.4 m).
- Optional choice of three economical, replaceable, bolt-on blade edges:
 - AR400 STEEL for use with sand bedding.
 - RUBBER for use with rubber mat floors.
 - URETHANE for use with rubber mat floors or concrete (where floor wear is a concern) and sand bedding. This is a great alternative material for longer wear.
- Universal scraper wings are replaceable.

Sleds

Sleds available for on-floor and recessed chain installations. Slider sleds allow chain to pass through for installations with unequal alley lengths.

56½" (1,435 mm) sleds provide scraper stability. 36½" (927 mm) sleds are available where a shorter sled is required.

For Rubber Flooring

Hard nylon rollers located on sled ends and scraper arms position the scraper above the rubber covered alleys, ensuring only rubber blades touch rubber flooring.
