FIELD.

## 20 Series GrainDecks

### Portable Pit = Productivity

The Brandt GrainDeck is a portable grain pit designed to boost your productivity. You simply drive your truck over the GrainDeck and unload, eliminating the need to position a hopper under the truck multiple times.

#### Drive Over, Drive Away

The 20-inch belt has a capacity of over 12,000 bu/hr, saving you time and getting your trucks back to the field faster. With convenient single set up positioning, the GrainDeck makes the job easy. Once in place, drivers can easily line up their trucks over the deck for quick and easy grain unloading without ever having to reposition the hopper.

#### Compact Capacity

##### LOW DECK HEIGHT

Trucks can easily clear the GrainDeck's low 5 ¾ inch deck height.

##### WIDE, COLLAPSIBLE HOPPER

At 38" by 118", the robust GrainDeck minimizes spillage and maximizes efficiency. Equipped with spring assisted collapsible hopper flaps, the GrainDeck works with all truck and trailer types to catch and move your grain quickly and efficiently.

#### Efficiently Versatile

Brandt has developed a bunker kit which allows you to convert the GrainDeck and the 20 Series Field GrainBelt to move in unison along your grain pile.

##### EZMOVE

The Brandt GrainDeck EZMOVE allows the operator to move the GrainDeck around the yard with ease. With the simple hydraulic joystick control, the EZMOVE system is extremely operator friendly while positioning your GrainDeck.

##### THE ULTIMATE PILING TEAM

Brandt's exclusive Bunker Kit allows you to hydraulically convert the GrainDeck and 20 Series Field GrainBelt to move in unison at 90° to your grain pile. By simply hitting your hydraulic lever on the tractor and attaching cables you can move the unit alongside the bunker without having to unhook and reposition each piece separately.

Powerful Value. **Delivered.**
