

AG SHIELD **CROSS AUGERS**

HARVEST MORE CROP FASTER

- Compatible with **ALL** Draper models
- **Saves time** when harvesting lodged crop
- **Increases** your overall yield
- **Unmatched** reliability

Increase ground speed up to 50% with the use of a cross auger.

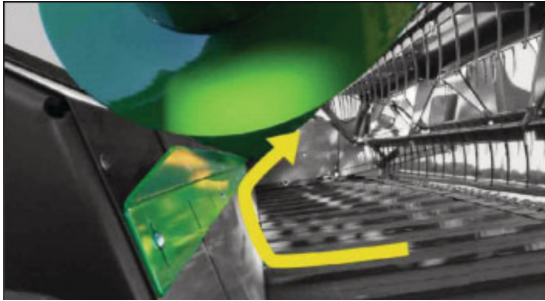

Increase in production will pay off your investment in a single year!

"I replaced my Deere built Cross Auger with an Ag Shield auger so that my 5th harvester could keep up with my other 4 Ag Shield equipped combines."

Jeff Prosko

KEY FEATURES:

PATENTED ANGLED STRIPPER BAR

Our patented Angled Stripper Bar comes with each auger kit.

The stripper bar deflects crop into the auger flighting and promotes fastest flow with less wrapping than competitors.

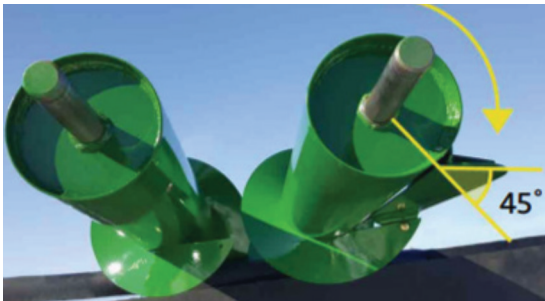

FULL LENGTH AUGER

Our Cross Auger spans the whole length of the header.

Moves lodged crop from the ends to the center of the header.

Blocks lodged crops from passing over the top of the header, saving seed loss.

Helps prevent over stressing of drives and sieves.

CENTER PADDLES

45° swept back unloading paddle pushes crop into the bullet or finger auger. Competing augers with straight paddles will wrap crop on the auger.

Paddles are removable for versatility in crop and harvest conditions.

- Auger kits for **ALL MAKES, MODELS AND LENGTHS** of combine headers.
- Augers are 6" OD pipe with a full 3" high flighting.
- Coarser 16" pitch allows reduced rpm and **ELIMINATES** wrapping **IN ALL CONDITIONS**.
- Hydraulic Driven augers with independent motor speed control.
- Complete bolt-on kits make for **fast & easy** installation for all makes and models of headers.
- Urethane paint provides **long-lasting shine** to match your harvester.
