

TWO-STROKE RACING OIL

SKU: 40603

CLEAN HORSEPOWER TEAM TESTED

Ester-based 100% synthetic oil engineered to minimize film and unburnt deposits that rob the engine of its power potential.

Ultra clean burning while still providing maximum horsepower and protection against wear.

- Engineered with our best base oils, resulting in more protection
- Proven 3-5% horsepower gains during long duration dyno runs when compared to competitors oil
- Dramatically cleaner results in Micro Coke Testing when compared to competitors oil

PUSH IT TO THE LIMIT. WE'LL PROTECT IT.

Red Line® Synthetic Oil has been engineering race winning lubricants for builders, racers, and riders for over 40 years. Proven on the pavement of Laguna Seca to Daytona and the dirt of Baja Mexico to Anaheim Stadium, Red Line Synthetic Oil uses extensive knowledge to create high-performance products for extreme race applications.

Our no compromise approach is backed by meticulous laboratory testing and real world racing in the engines of the top teams.

Red Line is proudly engineered and manufactured in the U.S.A.

TWO-STROKE RACING OIL

SKU: 40603

TEST RESULTS

This formulation keeps the engine cleaner longer than all other products on the market while delivering maximum horsepower without compromising protection. Delivers the best lubrication, especially if you have a new race bike recommending oil ratios as lean as 60:1. High temperature stability prevents deposits in the combustion chambers, exhaust ports, and piston crown.
