

FORKLIFT PLOW

THE PLOW

The Arctic Forklift Plow is a groundbreaking solution tailored specifically for forklift operations. This innovative plow is designed to transform your forklift into a powerful snow-clearing machine, making it ideal for warehouse lots, loading docks, and other commercial spaces where forklifts operate.

SPECIAL FEATURES

- Built for forklift / track steers
- Designed for Warehouse Lots and Loading Docks: Efficiently clear snow from areas that forklifts already navigate, enhancing productivity without needing additional equipment.
- Tight Spaces: Perfect for maneuvering in confined areas where traditional plows can't reach.
- Ideal for maintaining clear and safe paths in industrial environments, ensuring smooth operations during winter months.
