PRE-MILKING

UDDER WIPES

Kleen & Dri[®] Udder Preparation Procedure

1

Rub to remove any residual bedding.

2

Strip three streams from each teat.

3

Clean/wash each teat with circular motions.

4

Flip towel, wash/squeeze teat end.

5

Attach unit.

Kleen & Dri XL Towels improves milker's ability to clean the teat endskin while sloughing away dry cracked, bacteria harboring teat skin.

Kleen & Dri XL Towels are an easy one-step teat-prep alternative to using pre-dip and towels or udder washing and drying.

- **Time Saver** – One easy step! Eliminates a milk prep step, there is no longer a need to wipe dry after cleaning
- **Environmental** – Towels are biodegradable, and are made with a food grade ethanol that leave behind no residue, also a non-irritant to cows and milkers alike
- **Sanitary** – Sanitizes the hands of the milker between cows during prep
- **Healthy** – When used properly, helps reduce mastitis and maintains or lowers Somatic Cell Counts
- **Best Results** – Follow the simple brush, forestrip, wipe, wipe method. That is, brush loose dirt off the teat, forestrip onto the cow platform or into a strip cup, wipe across the teat opening and wipe down and around the teat
