# DUALEFLO

**MODULAR**

**DURABLE**

*BouMatic introduces the DualFlo swing over milking system. Built to BouMatic's tough quality standards, the DualFlo is an affordable way for dairy operators to develop a parlor-based milking system or upgrade their current milking parlor.*

## Easy and flexible milking system

- **Easy retro-fit into existing parlors** - designed for parallel or herringbone style parlors up to double 32 in size and is built for 28 or 30 inch stalls.
- **Quick installation - reduced down-time during retro-fit** - the DualFlo comes pre-assembled in 3 or 4 cow sections for quick installation, and is delivered complete with all milking equipment and milking units.
- **Durable** - the stainless swing-over arms are ruggedly built to take on your toughest milking requirements, session after session, day after day.
- **Lower overall parlor costs** - built with genuine BouMatic parts and components.
- **Many Custom Options** - the DualFlo has an array of custom options available that can provide **varying levels of automation** to adapt to any dairy operation – any management style.
  - No Detacher - Manual shutoff.
  - Detacher Only - Automatic takeoff.
  - Milk Yield Indicators - Individual cow performance without ID tags.
