## OUR MISSION

Our mission is to design, manufacture and distribute the highest quality, most durable and reliable farm equipment in the world, which is affordable and meets or exceeds the expectations of our most demanding customers.

Highline Manufacturing is a division of Bourgault Industries Ltd. and as such shares a common standard of "pursuing perfection" in their business approach. Highline's shared approach is to develop relevant products of the highest quality that exceed the expectations of our most discerning customers.

### PRESIDENT'S MESSAGE

In 2019, Highline received the Equipment Dealer's Association Gold Level Service Award. This is an award voted on by Highline's dealers which I believe illustrates Highline's commitment to meeting their needs but also the needs of the people who purchase and use its products.

Highline has also been aggressively developing new products and has an "all in" approach when it comes to advancing the state of livestock feeding equipment. Whether it is with the AccuMix<sup>™</sup> 1000s Feed Mixer, the two round bale CFR 1251 processor or the FS 1800 square bale stacker, you will witness Highline's commitment to this industry and to developing innovative equipment that can make your lives better and your operations more profitable.

### PRESIDENT OF BOURGAULT INDUSTRIES LTD.

Gerry Bourgault, P. Eng.

"Highline has also been aggressively developing new products and has an "all in" approach when it comes to advancing the state of livestock feeding equipment."

### **GENERAL MANAGER'S MESSAGE**

Our team continues to add products to our lineup that will help the hay producer save time and money. One of these new products is the FaStack<sup>™</sup> line of square bale stackers. The FaStack<sup>™</sup> has a number of industry exclusive features including the patented bale clamp, the impressive carrying capacity of the FS 1800, and the unique ability to stack on or off strings. The BM 605 and BM 607 single row round bale movers have the unique bale advance feature that automatically moves the last loaded bale back making it very easy for any operator to use. The BM 1400 is the proven performer of the group, with many of these machines in the field today having provided years of trouble free bale picking through the most difficult conditions. Our sales staff and our dealer network look forward to discussing the features of these machines with you soon!

### GENERAL MANAGER OF HIGHLINE MANUFACTURING

Bob Cochran, P. Eng.

"Our team continues to add products to our lineup that will help the hay producer save time and money."

## 2 FASTACK

### models

Stack Square Bales YOUR Way

FaStack™ 1800

### for all your square stacking needs.

Highline's line of large square bale stackers, including the FaStack<sup>™</sup> 1800 and FaStack<sup>™</sup> 1200 are easy to operate machines which have industry exclusive features that result in more bales picked in less time.

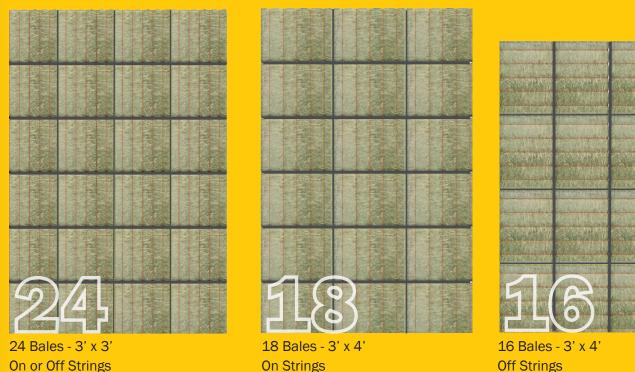

Stack with Added Flexibility

FaStack™ 1200

PAGE 10 PAGE 16

## On or Off the Strings

It's Your Choice.

## 12 Bales - 4' x 4' Strings On or Off Strings

## Flexibility in Stacking

With the FaStack™ 1200.

### FASTACK™ 1800

The number of bales that can be stacked is determined by the size of bale and the orientation of the bale. The FaStack™ can stack the bales "On Strings" (strings down) or "Off Strings" (strings on the side).

### FASTACK<sup>™</sup> 1200

FaStack™ indicates the ability to stack bales from the end of the stack with a rotating table, giving the user more flexibility as to where the bales can be stacked, whether it be in the field or in a shed.

## MORE BALES per load

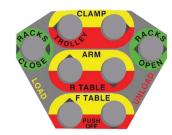

When every second counts, clear the field quickly. The Highline® FaStack™ allows you to do more, faster. With more bales per load than the competition, one operator can effectively retrieve bales from the field and stack them efficiently, making fewer trips, minimizing your costs, and maximizing your productivity.

### FASTACK™ 1800 Bale Turn Technology

With the Highline® FaStack™ you have the choice of stacking 'on' or 'off' strings, all from a hand-held remote with no manual adjustments of the machine. With the flip of a switch, you decide how the bales will stack.

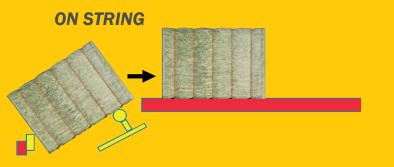

### **IMPROVED CONTROLS**

Taking control of the FaStack™ is easily done. The touch screen and remote control puts all of the unit's controls in one hand, allowing you to easily drive the tractor and operate the FaStack™ at the same time.

Ω L M J D T S C I M J S

### Bumper \_

The bumper cushions the impact of the bale to help maintain machine life and keep the integrity of the bale intact.

One tip is all it takes to unload. The load is gently and securely lifted to unload the stack.

Side Rails

Side rails secure the bales to keep them in place.

Clamp •-

The patented clamp arm grabs and lifts the bales up off the ground preventing scrubbing.

Flipper

Allows flexibility in your stacking, giving you the option to stack on or off the strings, depending on your needs.

### FS 1800 SPECIFICATIONS

Bale Capacity		
3' x 3' (Max. Weight - 1000	lb/454 kg)	24
3' x 4' On String (Max. Weig	ht - 1400 lb/635 kg)	18
3' x 4' Off String (Max. Wei	ght - <b>11</b> 00 lb/499 kg)	16
4' x 4' (Max. Weight - 1400	lb/635 kg)	12
Maximum Length of Bales		8' (2.44 m)
Length - Deck Lowered		31' 11" (9.73 m)
Length - Deck Raised		35' 1" (10.69 m)
Transport Height (Max)		10' 9" (3.27 m)
Height - Bed Tilted		17' 9" (5.40 m)
Transport Width - With Side Ra	acks	13' 7" (4.14 m)
ransport Width - Without Side Racks		N/A
Width - Arm Lowered (Clamp C	Closed)	
With Side R	acks	18' 8" (5.69 m)
Without Side Racks		N/A
Unloaded Weight		16796 lb (7625 kg
Hitch Weight Empty		3360 lb (1525 kg)
Hitch Weight - Loaded	Cat 3	Cat 4
3' x 3'	N/A	7410 lb (3361 kg)
3' x 4' On String	N/A	7300 lb (3311 kg)
3' x 4' Off String	N/A	7340 lb (3329 kg)

The FaStack™ 1800 uses a convenient in cab 12V 15 amp control.

# FS 1200

## STACKING MADE simple

The FaStack<sup>™</sup> 1200 includes the unique benefits of the FaStack<sup>™</sup> 1800, with the added feature of a rotating front table. With two bales on the front table, the FaStack<sup>™</sup> 1200 twists and turns the bales into their final position, ready to lift them onto the bed. For added security, add optional side rails to your FaStack<sup>™</sup> 1200 to keep the bales in place.

Two different stacking configurations!

Side stacking with the front table turned off (with the side rack option) gives you faster unloading

End stacking with the front table turned on gives you a tighter stack.

### FS 1200 Advantage

### FS 1200 SPECIFICATIONS

Bale Capacity - Cat 3

# BM 1400

## PICK FROM both sides

Highline® makes picking bales a breeze. Unloading can be done without ever leaving the cab and with Highline's ingenuity built into every bale mover, you can expect faster bale hauling with only one tractor and operator.

### Highline® offers non-stop picking and transporting with only one tractor and operator!

Back up the Highline® Bale Mover where you want the bales, tilt the bed, engage the conveyor chains and drive slowly forward. Bales are stored in a long, straight row to minimize weathering damage.

### BM 1400 SPECIFICATIONS

Configuration	Double Row	
Horsepower Required	100 hp (75 kW)	
Hydraulic Outlets Required	2	
Recommended Hyd. Flow	15 GPM @ 3000 psi	,
	60 lpm @ 207 Bar	
Bale Capacity	16 x 4' (1.22 m), 14 x 5' (1.52 m)	
Tongue Weight (Unloaded)	1740 lb (790 kg)	,
Tongue Weight (Loaded)	3423 lb (1554 kg)*	
Shipping Weight (Unloaded)	9660 lb (4386 kg)	
GVW	38000 lb (17252 kg)	
Tires	Eight 11L-15 12 ply	

\* If there are no bales behind the rear axle of the bale mover, the partially loaded hitch weight can exceed the fully loaded hitch weight even though the overall total is less than fully loaded.

Bed Length	37' (11.28 m)	
Overall Length	43' 9" (13.34 m)	
Transport Width	16' 8" (5.08 m)	
Width Unloaded	15' 2" (4.61 m)

# BM 607/605

## BALE MOVING made easy

Highline's BM 607 and BM 605 features benefits such as narrow transport and the Auto Bale Shuttle $^{\text{\tiny M}}$  to shift your bales while loading. These features help make bale moving fast and easy, saving you time and money.

## Auto Shuttle Feature Adds Convenience & Efficiency

Auto Shuttle is a design feature that allows the operator to automatically shift the last loaded bale back exactly one position so you can load the next bale without shuttling the load manually. As you lower the loading arm, the flow of hydraulics are moving the chains back to allow room to load the next bale. This is conveniently done in one easy step.

### BM 607/605 SPECIFICATIONS
