

New Del Morino "FLASH" Rotary Tiller

Specifically designed for small tractors (maximum 1430 lbs / 650 kg) from 12 to 24 HP and ideal for the semi-professional and for the weekend farmer, it is the only rotary tiller in its category which is both a rotary tiller and a stone burier. It can be transformed into a stone burier in two easy steps:

1. reverse the gearbox to reverse the rotational direction of the tines
2. reverse the tines so that the cutting edge is in the correct direction.

The FLASH rotary tiller has the advantage of a simple design (no chain, no chain lubrication, no side transmission), which makes it easy to use and maintain – an essential attribute for the inexperienced farmer. Thanks to an ingenious but simple transmission (patented), the tiller tines penetrate the ground with uniformity and consistency along the entire working width of the machine. The transmission is protected by a shear bolt, which assures safe and reliable operation for many years.

CODE	TYPE	HP	DEPTH inches /cm	WIDTH inches /cm	No. of HOES	WEIGHT lbs/kg
FLH 001AD	FLASH 85	12-24	5.9"/15cm	33.5"/85cm	16	209lbs/95kg
FLH 001BD	FLASH 105	12-24	5.9"/15cm	41.3"/105cm	20	231lbs/105kg
FLH 001CD	FLASH 125	12-24	5.9"/15cm	49.2"/125cm	24	253lbs/115kg

Standard features:

1. Rugged, powder painted frame
2. Adjustable category 1 three-point hitch
3. Central transmission with gears operating in an oil bath and protected by a shear bolt
4. Four (4) tiller tines per flange
5. Easily converts to stone burier
6. Standard cardan shaft included
7. Complies with stringent CE safety regulations
