5 SUPERFLEX MAGNUM SERIES PACKED

The Superflex concept has proven to be the most revolutionary design in packers for years. The independent floating design lets each section follow the contour of the soil giving more effective wheel to soil contact. The design also allows each section to independently float over obstacles such as stones without placing excessive weight on the gang causing wheel, shaft or bearing damage.

Construction of the **“Magnum Series”** allows us to produce 40 to 50 foot packers with 19” wheels and scrapers and still maintain sufficient capacity to incorporate heavier larger diameter wheels in the future should the demand arise.

Standard Features:

- Forged Pintle / Clevis Adjustable Hitch
- 7000lb Tongue Jack
- Grade 70 20,000 lb 3/8" DOT approved for agricultural use safety chains x 2
