

AG SHIELD

LAND ROLLERS

PROTECT YOUR EQUIPMENT AND HARVEST FASTER

- **Maintain a smooth & stone-free surface**
- **Increase seed germination**
- **Increase yield**
- **Level and seed at the same time (option)**

Models from 11' - 70' wide (1,3 and 5 sections)

KEY FEATURES:

PATENTED DIAGONAL PULL ARM

Eliminates most frame stress.

Comes standard on all multiplex units.

LEVELING BLADE (OPTION)

(Patented) The ONLY roller in the industry with this option.

Cut, spread and level mounds in hay fields, pasture and crop land.

Level and seed at the SAME TIME with optional Valmar seed applicator.

Blades are "Hard-Faced" to keep a sharp edge.

Blade rolls on adjustable gauge wheels for consistent level.

Blades available in widths from 11' - 52'.

POWERFOLD (OPTION)

Patented design allows the unit to unfold WITHOUT the need to back up or drive forward to get into or out of field position.

Perfect for when pulling behind your seeding train to eliminate a pass.

All multiplex rollers can be upgraded to a Powerfold at a later date.

STANDARD FEATURES:

- 4-way floating HD knuckles with 1 3/4" pins
- Hydraulic floating hitch (minimizes frame stress)
- Highway rated tires
- HD #213 bearings with 2 1/2" replaceable shafts
- Self-stowing transport safety locks
- Main transport tires act as packers between the outer drums in field position on the 5 section model (Patented design)
- Acre Counter

OPTIONS:

- Patented Leveling Blade (up to 52' wide)
- Patented POWERFOLD
- Water Fill Kit w/ 3" banjo couplings (up to 52' wide)
- Factory Installed Valmar Seed Applicator (up to 52' wide)
