FEATURE HIGHLIGHTS

Joy Stick Steering

Mercury-designed joystick piloting lets you maintain full control of your pontoon at slow speeds and in tight spaces and close quarters, putting easier-than-ever docking and maneuvering right at your fingertips.

Cool Touch Vinyl

Even on the hottest days, our cool-touch vinyl keeps the seating from heating up, meaning that everyone on board can enjoy every inch of the pontoon, all day long.

Fiberglass Painted Walls

The unique all fiberglass XT models step away from conventional pontoon design to provide you with the ultimate canvas to build your dream boat.

Digital Vessel Control

This digital system is at the heart of our Luxury & Sport models, providing you control of your vessel with a remote key fob and smartphone. Power on and off, dim lights, get diagnostics, and operate your boat at the touch of a button.

Power Sport Tower

Our watersports tower comes complete with power controls, bimini top, tow pylon, plus optional JL speakers. You can easily raise and lower the tower right from the Garmin digital dashboard.

Dual Engine

It's one thing to be excited about choosing a Manitou. It's another to feel the exhilaration at your fingertips from dual engines that are powerful enough to take your breath away. With our highest HP offering ever of up to 450 HP, you could be making waves with up to 900 HP with dual engines.
