

READY FOR WINTER?

PREP YOUR TWO-STAGE SNOWBLOWER FOR THE SEASON

5 SIMPLE STEPS TO MAKE SURE YOUR TWO-STAGE SNOWBLOWER IS READY FOR WINTER.

LOOK FOR DAMAGE ON AUGER, SKIDS, & SCRAPER
 Make sure your auger, skids and scraper are in good shape. Skids should have 1/8" – 3/16" of clearance. Look for excessive wear, dents or other damage. If one of these parts need replacing, we recommend using Genuine Toro Parts.

ADJUST TIRE PRESSURE IF NECESSARY
 See your owner's manual for recommended PSI for your snowblower. You can also add tire chains for even better traction.

USE FRESH FUEL & OIL
 Your snowblower should use fuel that is no more than 30 days old and no more than 10% ethanol. For ultimate fuel life and performance, add Toro Fuel Treatment. If you did not change the oil at the end of the previous season, you should do this as well.

CHECK CABLES, HANDLES & FASTENERS
 Ensure all cables, guards, handles and fasteners are secure and in place. If you find any are missing or broken, replace with Genuine Toro Parts.

REVIEW THE OPERATION AND SAFETY FEATURES IN YOUR OWNER'S MANUAL
 Take a look through the operation and safety sections of your owner's manual. Be sure to wear the recommended footwear and clothing, and follow all other safety recommendations.

PROTECTIVE COVER
 Part #490-7466

GET THE MOST FROM YOUR SNOWBLOWER

Protect the reliability of your snowblower with parts designed specifically for your Toro model. Genuine Toro parts are made from premium materials and engineered to enhance the safety and performance of your Toro equipment. Plus, every part we ship comes with a one-year full warranty*.
