

BLACKWATER

INFLATABLE BOATS

Our Story

Our goal was to redefine the classic Rigid Inflatable Boat from its undeniably functional inception and transform it to a unique and carefully personalized vessel that will transcend functionality. Our love of family and boating brought on an inspiration to create a dinghy that is not only a vessel of safety and convenience, but also one that enhances the entire boating experience, catered to each operator's unique requirements in an affordable way.

"The water is the limit" when it comes to what our modern RIB can do. Our goal of introducing a family centered product did not come lightly. After having owned and tested countless dinghies over the years, amongst families and friends of all ages and skill levels, we would inevitably come back to the question of why such an invaluable asset had so many limitations?

Aesthetic Functionality, Diversity Maneuverability

With 50 years of combined experience in the industry, we have diligently procured manufacturing partners with whom we have established a steadfast relationship that will ensure our commitment to keeping the specific needs of Canadian boaters at the forefront of our values.
