

RIVER RUNNER

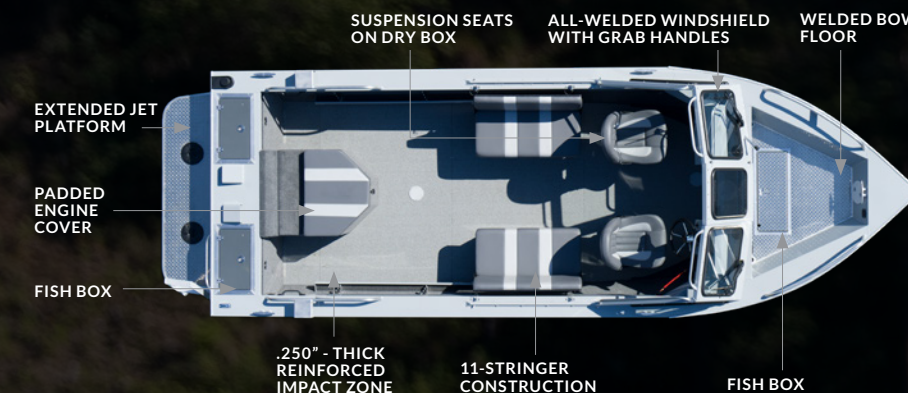

180|200

Heavy-gauge, all-welded jet boats usually mean big, heavy, V8 engines and pumps that are expensive to run and maintain. That is not the case with the 230hp BRP Rotax-powered Hewescraft River Runner.

This white-water-proven boat pairs the compact 10°-deadrise hull of the Hewescraft Sportsman with a light, fuel-efficient, four-stroke Rotax inboard jet power plant. The River Runner will take you through rapids and into skinny water without the outrageous fuel expense. When you need a Hells-Canyon-proven, jet inboard that won't break the bank, there's value—and then there's Hewescraft River Runner value.

200 RIVER RUNNER
